Objective

Passionate 4th-year Data Science student dedicated to turning data into impactful solutions, with hands-on experience building machine learning models and deploying end-to-end applications. Proven ability to work in fast-paced environments through participation in hackathons. Eager to contribute to real-world data science challenges and grow in a collaborative, innovation-driven team.

Education

CMR College of Engineering & Technology <i>B.Tech – Computer Science & Engineering (Data Science)</i> CGPA: 8.55	Hyderabad, Telangana <i>Sep 2023 – Jun 2027</i>
Resonance Junior College <i>Intermediate (MPC)</i> Percentage: 91%	Hyderabad, Telangana <i>Jun 2021 – Mar 2023</i>
St. Andrew's High School <i>CBSE</i> Percentage: 88%	Hyderabad, Telangana <i>Mar 2021</i>

Technical Skills

Languages & Query: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), SQL (MySQL), Java, C
Data Visualization: Power BI, Matplotlib, Seaborn, Plotly
Machine Learning: Supervised/Unsupervised Learning, CNNs, TensorFlow, Scikit-learn
Web & Tools: HTML, CSS, JavaScript, Flask, React, GitHub, VS Code
Core Competencies: Data Wrangling, Statistical Analysis, EDA, Data Structures & Algorithms, OOP

Projects

Skin Dx – AI-Powered Skin Disease Detection | *Python, TensorFlow, Flask, React* Epitome 2025 Hackathon

- Built a deep learning pipeline using CNNs to classify skin diseases from image data with high prediction accuracy.
- Performed data preprocessing and augmentation on medical image datasets to improve model generalization.
- Integrated real-time prediction API using Flask; deployed a responsive React web app for end-user accessibility.
- Incorporated an AI chatbot leveraging model output to surface disease-related insights, precautions, and guidance.

Predictive Healthcare Analytics Platform | *Python, Scikit-learn, Power BI*

- Designed a conceptual analytics platform to predict patient risk scores using classification models (Logistic Regression, Random Forest).
- Created interactive Power BI dashboards to visualize patient trends, risk distributions, and hospital KPIs.
- Applied EDA techniques — correlation analysis, outlier detection, and feature importance — to surface actionable insights.

Achievements & Certifications

Top 5 Finalist – Epitome 2025 <i>Hackathon – Skin Dx (AI Skin Disease Detection)</i>	Gokaraju Rangaraju Institute of Engineering & Technology <i>2025</i>
– Secured Top 5 position among competitive teams at the Epitome 2025 Hackathon organized by the Skill Development Cell, GRIET.	
Introduction to Data Science – Online Certification <i>Gained knowledge of data science fundamentals, cyber threats, and security best practices.</i>	Cisco <i>January 2026</i>
Salesforce Certified Agentforce Specialist <i>Demonstrated expertise in Agentforce capabilities, automation, and AI-driven workflows.</i>	Salesforce <i>January 2026</i>
